Our Promoters Sarvapriya Bansal and Avnish Bansal do not have adequate experience in health and hygiene industry and we cannot assure that this will not affect our business growth. However, our Promoters have experience in textile industry and have good track record.

4. *An increase in the prices of our basic raw material i.e. raw cotton could raise our manufacturing costs and could adversely affect our profitability.*

We have no control on the prices of our basic raw material i.e. raw cotton. The prices of raw cotton could fluctuate due to availability and demand. In the recent past, there have been fluctuations in the prices of raw cotton both at domestic and international levels. Such fluctuations in prices of raw material and our inability to negotiate at optimum market rates may affect our profitability.

We typically do not enter into any long term supply agreements with our suppliers and our major requirement is met in the spot market. We may be unable to control the factors affecting the price at which we procure our raw material. We also face the risks associated with compensating for or passing on such increase in our cost of production on account of such fluctuations in prices to our customers. Upward fluctuations in the prices of raw material may thereby affect our margins and profitability, resulting in a material adverse effect on our business, financial condition and results of operations.

5. *We are exposed to foreign currency exchange rate fluctuations, which may harm our results of operations, impact our cash flows and cause our financial results to fluctuate.*

We are exposed to foreign currency exchange fluctuations as our Company is engaged in manufacturing and export of absorbent cotton and cotton waste recycling. Our products are mainly exported to the Poland, Italy, Russia, Greece, etc. The exchange rate between the Indian Rupee and these currencies, primarily the Euro, has fluctuated in the past and our results of operations and cash flows have been impacted by such fluctuations in the past and may be impacted by such fluctuations in the future. For example, during times of strengthening of the Indian Rupee, we expect that our overseas sales and revenues will generally be negatively impacted as foreign currency received will be translated into fewer Indian Rupees. However, the converse positive effect of depreciation in the Indian Rupee may not be sustained or may not show an appreciable impact in our results of operations in any given financial period, due to other variables impacting our business and results of operations during the same period.

We may, therefore, suffer losses on account of foreign currency fluctuations for sale of our products to our international customers, since we may be able to revise the prices, for foreign currency fluctuations, only on a periodic basis and may not be able to pass on all losses on account of foreign currency fluctuations to our customers. Our Company offsets this risk of foreign fluctuation by way hedging.

6. *Our business is not seasonal in nature, but the availability of raw material is seasonal in nature and hence we require substantial working capital.*

The business in which our Company is engaged in not seasonal, however, the availability raw materials are seasonal in nature. Our Company has made adequate arrangement for warehousing to store raw material. The warehousing of raw material to counter its non availability during off season requires substantial investment of our working capital in the inventories

7. *Our business operations involve handling of Boiler Plant and risks arising from the same may result in damages to life and property, as also exposure to litigations.*

Our manufacturing process requires steam, which is produced by a boiler plant using Bio coal and Steam Coal. We are also required to obtain several licenses and approvals for the handling of Boiler Plant, which in turn impose several obligations and restrictions on our Company. If improperly handled or subjected to less than optimal conditions, this Boiler Plant could harm employees and other persons, causing damage to life and property and harming the environment. This in turn could subject our Company to significant penalties including closure of our manufacturing units and / or litigation which may have an adverse effect on our business and financial operations. However, our Company ensures and maintains desired control systems. For description of the regulations and laws applicable to our Company in this regard, please refer to the chapter titled “Key Industry Regulations and Policies” beginning on page 126 of this Prospectus. For details of licenses and approvals obtained by our Company, please refer to the chapter titled “Government and Other Statutory Approvals” beginning on page 251 of this Prospectus

8. ***We are dependent upon few suppliers for our raw material for our current manufacturing facilities. In an eventuality where our suppliers are unable to deliver us the required materials in a time-bound manner it may have a material adverse effect on our business operations and profitability.***

For the period ended September 30, 2017 our top 10 suppliers contributed around 75.28 % and top 5 suppliers contributed around 53.28% of our purchases. In the event of a delay, inadequacy or default in deliveries by any of our vendors, we may not be able to source our raw material on an adequate and timely basis or on commercially acceptable terms. A major disruption to the timely and adequate supplies of our raw materials could adversely affect our business, results of operations and financial condition. Any problems faced by our suppliers in their manufacturing facilities resulting in delays or non-adherence to quality requirements could adversely impact our ability to meet our customer's requirements in time and our operations would be affected to the extent we are unable to line up supplies from alternate suppliers.

9. ***Our historical revenues have been significantly dependent on few Industrial Customers and our inability to maintain such business may have an adverse effect on our results of operations.***

For the year ended March 31, 2017, sales to our top 10 customers contributed around 78.04 % and top 5 customers contributed around 58.99% of our revenues from operations. Our business from customers is dependent on our continuing relationship with such customers, the quality of our products and our ability to deliver on their orders, and there can be no assurance that such customers will continue to do business with us in the future on commercially acceptable terms or at all. If our customers do not continue to purchase products from us, or reduce the volume of products purchased from us, our business prospects, results of operations and financial condition may be adversely affected. Significant dependence on them may increase the potential volatility of our results of operations and exposure to individual contract risks. In the event that any of these customers discontinue purchase of products from us, our results of operations and financial condition may be adversely affected.

10. ***Our Company has not complied with certain statutory provisions under Companies Act. Such non-compliances/lapses may attract penalties.***

Our Company has not complied with certain statutory provisions such as the following:

- Provision of Section 73 of the Companies Act, 2013 with respect to availment of unsecured loans from persons other than the directors, relatives of directors and members of the Company during the past.
- Non-compliance with section 203 of Companies Act, 2013 by not appointing a Company Secretary for some period of time. However, as on date of this Prospectus, our Company has appointed a Company Secretary.
- Non-compliance of section 185 of Companies Act, 2013, for certain period of time as our Company advanced loan to directors. However, as on date of filing this Prospectus, our Company has not advanced any loans to directors.

Further, our Company has delayed filing of some forms under the Companies Act. No show cause notice in respect of the above has been received by the Company till date, any penalty imposed for such non-compliance in future by any regulatory authority could affect our financial conditions to that extent. Such delay/noncompliance may in the future render us liable to statutory penalties and disallowing the resolutions, which may have consequence of violation of statutory provisions concerned.

11. ***Our Company violated Regulation 45 of SEBI (LODR): Change in Name of Listed Entity,s while it was listed on Emerge- Institutional Trading Platform of the National Stock Exchange of India Limited***

Our Company was listed on Emerge- Institutional Trading Platform of National Stock Exchange of India Limited and was required to seek approval from Stock Exchange before changing its name from Mohini Fibers Limited to Mohini Health & Hygiene Limited as per Regulation 45 of SEBI (Listing Obligation & Disclosures Requirement), our Company violated the said Regulation and changed its name to Mohini Health & Hygiene Limited without seeking approval from Stock Exchange for the same. However, our Company later made application to Stock Exchange for approving the new name and Stock Exchange approved the same before Company got voluntarily delisted from Company.

12. *We have in the past entered into related party transactions and may continue to do so in the future.*

Our Company has entered into various transactions with our Promoters, Promoter Group, Directors and their Relatives. While we believe that all such transactions are conducted on arms length basis, there can be no assurance that we could not have achieved more favorable terms had such transactions were not entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operation. For details on the transactions entered by us, please refer to chapter “Related Party Transactions” beginning on page 165 of the Prospectus.

12. *We do not have any offshore office or business place to look after our export operations.*

We sell our products to both domestic as well as international markets. A significant portion of our revenue from operations is derived from international markets. However, we do not have any offshore office as a result of which we may not be able to capitalize on opportunities offered by the evolving international market in a timely manner. The business operations of our Company are mainly handled from our registered office located at Pithampur. Apart from this, our Company does not have any place of business overseas either in the nature of liaison office or corporate office. Due to this, we may not be able to expand our business effectively in the international market, thereby affecting the results of operations and profitability.

13. *Credit rating of our Company.*

The cost and availability of capital, amongst other factors, is also dependent on our credit ratings. We had been last rated by CARE Ratings long term rating at CARE BB+ (Assigned) and long term/short term bank facilities rating at CARE BB+ (Reaffirmed). Ratings reflect a rating agency’s opinion of our financial strength, operating performance, strategic position, and ability to meet our obligations. Any downgrade of our credit ratings would increase borrowing costs and constrain our access to capital and lending markets and, as a result, could adversely affect our business. In addition, downgrades of our credit ratings could increase the possibility of additional terms and conditions being added to any new or replacement financing arrangements.

14. *We do not own the land on which our manufacturing facility and registered office are located.*

We do not own the land on which our manufacturing facility and registered offices are located. Our manufacturing facility and registered office situated at Plot No 109, Sector 3 Industrial Area Pithampur, Dhar, Madhya Pradesh 454774, India is taken on lease from M.P. Audyogik Kendra Vikas Nigam, which is valid for a period of 99 years from September 22, 2009. If we do not comply with certain conditions of the lease agreement, the lessor may terminate the lease, which could have an adverse affect on our operations and there can be no assurance that renewal of lease agreement with the owner will be entered into. In the event of non-renewal of lease, we may be required to shift our manufacturing facilities to a new location and there can be no assurance that the arrangement we enter into in respect of new premises would be on such terms and conditions as the present one.

15. *Our Company has negative cash flows from its investing and financing activities in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.*

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

16. Our Company requires significant amounts of working capital for a continued growth. Our inability to meet our working capital requirements may have an adverse effect on our results of operations.

Our business is working capital intensive. A significant portion of our working capital is utilized towards trade receivables. Summary of our working capital position is given below:-

We intend to continue growing by expanding our business operations. This may result in increase in the quantum of current assets particularly trade receivables. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapter titled "Objects of the Issue" beginning on page 87 of this Prospectus.

17. We require a number of approvals, NOCs, licences, registrations and permits in the ordinary course of our business. and any failure or delay in obtaining the same in a timely manner may adversely affect our operations.

We need to apply for renewal of approvals which expire, from time to time, as and when required in the ordinary course of our business. Pursuant to our conversion from a private limited company to a public limited company in the year 2015, we need to take necessary steps for transferring the approvals of our company in the new name i.e. “Mohini Health & Hygiene Limited”.

Any failure to renew the approvals that have expired, or to apply for and obtain the required approvals, licences, registrations or permits, or any suspension or revocation of any of the approvals, licences, registrations and permits that have been or may be issued to us, could result in delaying the operations of our business, which may adversely affect our business, financial condition, results of operations and prospects. Our ability to market and sell our products depends upon the recognition of our brand names and associated consumer goodwill. Currently, we have applied for registration of our logo

and it is pending. There is no guarantee that the application for registration of our

logo will be accepted in favour of the Company. This may affect our ability to protect our trademark in the event of any infringement of our intellectual property. In the absence of such registrations, competitors and other companies may challenge the validity or scope of our intellectual property right over these brands or our corporate name or logo. As a result, we may be required to invest significant resources in developing new brands or names, which could materially and adversely affect our business, financial condition, results of operations and prospects.

Our failure to comply with existing or increased regulations, or the introduction of changes to existing regulations, could adversely affect our business, financial condition, results of operations and prospects.

Our manufacturing process requires substantial amount of power facilities. The quantum and nature of power requirements of our industry and Company is such that it cannot be supplemented/ augmented by alternative/ independent sources of power supply since it involve significant capital expenditure and per unit cost of electricity produced is very high. Any disruption / non availability of power shall directly affect our production which in turn shall have an impact on profitability and turnover of our Company.

Any failure or defect in our products could result in a claim against us for damages, regardless of our responsibility for such a failure or defect. However, our Company is well equipped with in-house testing laboratory to test the products. Our finished products has to undergo a strict quality check to ensure that they are of relevant quality as per the standards set. Our in house testing laboratory regulates and monitors the quality and ensures that the same is as per the required standards. Although we attempt to maintain quality standards, we cannot assure that all our products would be of uniform quality, which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity.

Also, our business is dependent on the trust our customers have in the quality of our products. Any negative publicity regarding our company, brand, or products, including those arising from a drop in quality of merchandise from our vendors, mishaps resulting from the use of our products, or any other unforeseen events could affect our reputation and our results from operations.

22. *Our operations may be adversely affected in case of industrial accidents at any of our production facilities.*

Usage of heavy machinery, handling of materials by labour during production process or otherwise, lifting of materials by humans, cranes, etc. may result in accidents, which could cause injury to our labour, employees, other persons on the site and could also damage our properties thereby affecting our operations. Occurrence of accidents could hamper our production and consequently affect our profitability.

Though our business has not experienced any disruptions due to transportation in the past, any future transportation issues may have an adverse effect on our business. In addition goods may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of products which may also affect our business and results of operation negatively. An increase in the freight costs or unavailability of freight for transportation of our raw materials may have an adverse effect on our business and results of operations.

Further, disruptions of transportation services due to weather-related problems, strikes, lock-outs, inadequacies in the road infrastructure, or other events could impair ability to procure raw materials on time. Any such disruptions could materially and adversely affect our business, financial condition and results of operations.

25. *Compliance with, and changes in, safety, health and environmental laws and regulations may adversely affect our business, prospects, financial condition and results of operations.*

If we suffer a significant uninsured loss or if insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

Under our financing arrangements, we are required to obtain the prior, written lender consent for, among other matters, changes in our capital structure. Further, we are required to maintain certain financial ratios.*

There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain the consents necessary to take the actions we believe are necessary to operate and grow our business. Our level of existing debt and any new debt that we incur in the future has important consequences. Any failure to comply with these requirements or other conditions or covenants under our financing agreements that is not waived by our lenders or is not otherwise cured by us, may require us to repay the borrowing in whole or part and may include other related costs. Our Company may be forced to sell some or all of its assets or limit our operations. This may adversely affect our ability to conduct our business and impair our future growth plans. For further information, see the chapter titled “*Financial Indebtedness*” on page 229 of the Prospectus.

Though these covenants are restrictive to some extent for us, however it ensures financial discipline, which would help us in the long run to improve our financial performance.

30. *The industry segments in which we operate being fragmented, we face competition from other players, which may affect our business operations and financial conditions.*

The market for our products is competitive on account of both the organized and unorganized players. Players in this industry generally compete with each other on key attributes such as technical competence, quality of products, distribution network, pricing and timely delivery. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive.

Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

31. *We have taken guarantees from Promoters in relation to debt facilities provided to us.*

We have taken guarantees from Promoters in relation to our secured debt facilities availed from our Bankers. In an event any of these persons withdraw or terminate its/their guarantees, the lender for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lender and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could adversely affect our financial condition. For more information please see the chapter titled “*Financial Indebtedness*” beginning on page 229 of this Prospectus.

32. *Our Company has unsecured loans which are repayable on demand. Any demand loan from lenders for repayment of such unsecured loans, may adversely affect our cash flows.*

As on September 30, 2017, our Company has unsecured loans amounting to Rs. 237.27 lakhs from related and other parties that are repayable on demand to the relevant lender. Further, some of these loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lender at any time. Any such unexpected demand or accelerated repayment may have a material adverse effect on the business, cash flows and financial condition of the borrower against which repayment is sought. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows. For further details of unsecured loans of our Company, please refer the chapter titled Financial Statements as Restated beginning on page 167 of this Prospectus.

33. *Orders placed by customers may be delayed, modified, cancelled or not fully paid for by our customers, which may have an adverse effect on our business, financial condition and results of operations.*

We may encounter problems in executing the orders in relation to our products, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers may postpone the delivery of such products or cause its cancellation. Due to the possibility of cancellations or changes in scope and schedule of delivery of such products, resulting from our customers discretion or problems we encounter in the delivery of such products or reasons outside our control or the control of our customers, we cannot predict with certainty when, if or to what extent we may be able to deliver the orders placed. Additionally, delays in the delivery of such products can lead to customers delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such products. In addition, even where a delivery proceeds as scheduled, it is possible that the customers may default or otherwise fail to pay amounts owed. While we have not yet experienced any material delay, cancellation, execution difficulty, payment postponement or payment default with regard to the orders placed with us, or disputes with customers in respect of any of the foregoing, any such adverse event in the future could materially harm our cash flow position and income.

34. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the issue. Further we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the issue. We meet our capital requirements through our bank finance, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely

affect our growth plans. For further details please refer to the chapter titled “Objects of the Issue” beginning on page 87 of this Prospectus.

35. *Failure or disruption of our IT and/or business resource planning systems may adversely affect our business, financial condition, results of operations, cash flows and prospects.*

We have implemented various information technology (“IT”) and/or business resource planning systems to cover key areas of our operations. We are dependent on technology in relation to customer order management and dispatches, production planning and reporting, manufacturing processes, financial accounting and scheduling raw material purchase and shipments. We rely on our IT infrastructure to provide us with connectivity and data backup across our locations and functions. While the business resource planning systems that we have implemented have enabled us to improve our working capital cycles, despite an increase in our sales over the period, we can provide no assurance that we will be able to do so in the future.

We believe that we have deployed adequate IT disaster management systems including data backup and retrieval mechanisms, at our manufacturing facility and registered office. However, any failure or disruption in the operation of these systems or the loss of data due to such failure or disruption (including due to human error or sabotage) may affect our ability to plan, track, record and analyze work in progress and sales, process financial information, manage our creditors, debtors and hedging positions, or otherwise conduct our normal business operations, which may increase our costs and otherwise adversely affect our business, financial condition, results of operations and cash flows.

36. *Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and manufacture and trade inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, which could have an adverse impact on our income and cash flows. We estimate our sales based on the forecast, demand and requirements and also on the customer specifications. Natural disasters such as earthquakes, extreme climatic or weather conditions such as floods or droughts may adversely impact the supply of raw material and local transportation. Should our supply of raw materials be disrupted, we may not be able to procure an alternate source of supply in time to meet the demands of our customers. Such disruption to supply would materially and adversely affect our business, profitability and reputation. In addition, disruptions to the delivery of product to our customer may occur for reasons such as poor handling, transportation bottlenecks, or labour strikes, which could lead to delayed or lost deliveries or damaged products and disrupt supply of these products. To improve our line capability, we try to stock our inventory at our manufacturing facility. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively. If we over-stock inventory, our capital requirements will increase and we will incur additional financing costs. If we under-stock inventory, our ability to meet customer demand and our operating results may be adversely affected. Any mismatch between our planning and actual consumer consumption could lead to potential excess inventory or out-of-stock situations, either of which could have an adverse effect on our business, financial condition and results of operation.

37. *Intellectual property rights are important to our business and we may be unable to protect them from being infringed by others which may adversely affect our business value, financial condition and results of operations*

As on the date of Prospectus, we have made application for registration of trademark, however we

have not yet obtained registration for our corporate logo “” and hence we do not

enjoy the statutory protection accorded to a registered trademark. However, there can be no assurance that our either of our applications will succeed. Grounds for refusal of registration may include the validity or scope of the application. If we are unable to obtain a registration, we may still continue to use the corporate logo but remain vulnerable to infringement and passing-off by third parties and will not be able to enforce any rights against them. We may also need to change our corporate logo which may adversely affect our reputation and business and could require us to incur additional costs. Although, we believe that that our present systems are adequate to protect our confidential information and intellectual property, there can be no assurance that our intellectual property data, trade secrets or proprietary technology will not be copied, infringed or obtained by third parties. Further, our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. This may lead to litigations and any such litigations could be time consuming and costly and their outcome cannot be guaranteed. Our Company may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property, which may adversely affect our business, financial condition and results of operations. For further details pertaining to our intellectual property, please refer to the chapter titled "Our Business" beginning on page 117 of this Prospectus.

38. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see "Dividend Policy" on page 166 of this Prospectus.

39. *Within the parameters as mentioned in the chapter titled 'Objects of this Issue' beginning on page 87 of this Prospectus, our Company's management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.*

We intend to use entire Issue Proceeds towards meeting the working capital requirement, general corporate purpose and to meet the issue expenses. We intend to deploy the Net Issue Proceeds in financial year 2017-18 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Issue Proceeds, please refer chapter titled "Objects of the Issue" beginning on page 87 of this Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company's Board of Directors. The fund requirement and deployment is based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled 'Objects of the Issue' beginning on page 87 of this Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue. Our Board of Directors will monitor the proceeds of this Issue.

40. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.*

Since the Issue size is less than Rs.10,000 lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

41. Our future funds requirements, in the form of issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

42. Our success depends largely upon the services of our Directors, Promoters and other Key Managerial Personnel and our ability to attract and retain them. Demand for Key Managerial Personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company.

Our success is substantially dependent on the expertise and services of our Directors, Promoters and our Key Managerial Personnel. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. Our future performance will depend upon the continued services of these persons. Demand for Key Managerial Personnel in the industry is intense. We cannot assure you that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations.

43. In addition to normal remuneration or benefits and reimbursement of expenses, some of our Directors and key managerial personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.

Our Directors and Key Managerial Personnel are interested in our Company to the extent of remuneration paid to them for services rendered and reimbursement of expenses payable to them. In addition, some of our Directors and Key Managerial Personnel may also be interested to the extent of their shareholding and dividend entitlement in our Company. For further information, see “Capital Structure” and “Our Management” on pages 70 and 144, respectively, of this Prospectus.

44. Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.

After completion of the Issue, our Promoters and Promoter Group will collectively own 61.57% of the Equity Shares. As a result, our Promoters together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

45. *We may not be successful in implementing our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

46. *Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.*

Modernization and technology upgradation is essential to provide better products. Although we strive to keep our technology in line with the latest standards, we may be required to implement new technology or upgrade the existing employed by us. Further, the costs in upgrading our technology could be significant which could substantially affect our finances and operations.

47. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

48. *Industry information included in this Prospectus has been derived from industry reports commissioned by us for such purpose. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

EXTERNAL RISK FACTORS

Industry Risks:

52. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

Other Risks

53. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under the Income-tax Act, 1961, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India except any gain realised on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the STT has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain realised on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realised on the sale of shares on a stock exchange held for a period of 12 months or less will be subject to short term capital gains tax. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India. By way of the Finance Bill, 2017, the Government of India has proposed to introduce certain anti-abuse measures, pursuant to which, the aforesaid exemption from payment of capital gains tax for income arising on transfer of equity shares

shall only be available if STT was paid at the time of acquisition of the equity shares. While the said provision has not been notified as on date, it is expected to take effect from April 1, 2018 and will, accordingly, apply in relation to the assessment year 2018-19 and subsequent assessment years. Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

54. *Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Prospectus.*

As stated in the reports of the Auditor included in this Prospectus under chapter "Financial Statements as restated" beginning on page 167 the financial statements included in this Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Prospectus. Accordingly, the degree to which the financial information included in this Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Prospectus should accordingly be limited.

55. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- custom duties on imports of raw materials and components;
- Goods and Service Tax
- Other new or special taxes and surcharges introduced on a permanent or temporary basis from time to time.

These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

56. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

58. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

59. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

60. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

61. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an

adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

62. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

63. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. INTRODUCTION TO INDIAN HEALTHCARE INDUSTRY

The Indian healthcare sector is expected to register a compound annual growth rate (CAGR) of 22.9 per cent during 2015-20 to US\$ 280 billion. Rising income level, greater health awareness, increased prevalence of lifestyle diseases and improved access to insurance would be the key contributors to growth.

The private sector has emerged as a vibrant force in India's healthcare industry, lending it both national and international repute. It accounts for almost 74 per cent of the country's total healthcare expenditure. Telemedicine is a fast-emerging trend in India; major hospitals (Apollo, AIIMS, Narayana Hrudayalaya) have adopted telemedicine services and entered into a number of public-private partnerships (PPP). Further, presence of world-class hospitals and skilled medical professionals has strengthened India's position as a preferred destination for medical tourism. Further investment in healthcare infrastructure is set to rise, benefiting both 'hard' (hospitals) and 'soft' (R&D, education) infrastructure.

In October 2017, All India Institute of Ayurveda (AIIA) was inaugurated in New Delhi which will bring synergy between the traditional wisdom of Ayurveda and modern diagnostic tools and technology.

The Government of India aims to develop India as a global healthcare hub. It has created the National Health Mission (NHM) for providing effective healthcare to both the urban and rural population. The Government is also providing policy support in the form of reduced excise and customs duty, and exemption in service tax, to support growth in healthcare.

The Indian Surgical Equipments, Medical Devices & Pharmaceutical Machineries Industry

The Indian medical devices industry is currently valued at around US\$ 5 billion which is 2% of the US\$ 250 billion industry. The overall healthcare industry in India is valued at USD 90 Billion which is expected to reach US\$ 220 billion by the year 2020. Thus India's medical devices, surgical equipment and pharmaceutical industry is poised to grow significantly in the coming years and emerge cost effective supplier of the products to the whole world.

The Indian surgical equipment, medical device and pharmaceutical machinery industry is fragmented with close to 1,800 domestic firms who are predominantly MSMEs, primarily competing in the range of low to medium technology products. However, in recent years there has been a paradigm shift in the manufacturing landscape and which now have expanded for producing more cost-effective to number high end products including hi tech R&D and testing in the sector. The domestic market caters to low-value disposables and supplies space, whereas importers dominate the costly and high end medical equipments with extensive service networks

The Indian medical devices industry is a sunrise segment in the healthcare space. With focus on technology, innovation and a conducive regulatory framework, this sector will attract investments from the private sector. This would help Indian companies to become originators rather than traders.

International companies in this field are also using India as a manufacturing base by either setting up facilities of their own or by acquiring domestic manufacturers. Some examples include 3 M's manufacturing plant in Pune, Becton Dickinson's manufacturing facility in Haryana, Hollister's setting up manufacturing facility in India and Philips Medical Systems' acquisition of Medtronics and Alpha X-Ray Technologies.

Some examples include 3 M's manufacturing plant in Pune, Becton Dickinson's manufacturing facility in Haryana, Hollister's setting up manufacturing facility in India and Philips Medical Systems' acquisition of Medtronics and Alpha X-Ray Technologies.

Recent initiatives taken by the Government of India are:

The Government has launched voluntary scheme 'ICMED' or Indian Certification of Medical Devices to bring international respect to medical devices which are made in India.

1. With effect from January 1, 2016 the Government has scrapped the requirements of obtaining a 'No Objection Certificate' from the Ministry of Health for exports meant to developed countries. This is because these nations have scrutiny mechanism before importing from India, and since our exporters take due approvals from importing countries, this additional information is not required.
2. 100% FDI has been allowed in order to promote world class manufacturing and enhance competencies in the local manufacturing. Existing companies or setting up of new companies

are allowed to bring FDI under automatic route in the medical devices sector. FDI inflow will spur R&D and manufacturing innovations, in turn increasing the efficiency and effectiveness of medical electronic products. Advancement of medical electronic product quality and associated successful diagnostic rates are expected to create a spurt in adoption.

3. National Medical Device Policy 2015 focuses on R&D, testing and quality for domestic manufacturing.
4. The Government of India unveiled start-up policy aiming to encourage entrepreneurs in overall manufacture of goods and services. The policy in itself has covered significant benefits such as barriers to the entry have been diluted, a large corpus of seed funds have been earmarked, tax benefits have been extended and regulatory requirements have been significantly done away with.
5. To stimulate domestic manufacturing, the Government of India has announced (on 19th January 2016) withdrawal of earlier concessional import duty. Notification on Chapter 90 items and restricting this Concessional Duty to only 12 Medical Devices of this notification whereby the custom duties have been increased from 5% (0%) to 7.5% as earlier and SAD of 4% have been re-imposed on 67 items of the 117 items identified as Medical Devices.
6. In order to boost self-sustaining industry oriented R&D mechanism, the Ministry of Commerce and Industry has undertaken an initiative for technological upgradation for boosting engineering exports. Wherein, 34 products at 8 Digit HS Code tariff lines in the medical devices have been identified, having significant global export potential. These products are mainly related to Chapter 90 i.e Optical, Photographic Cinematographic Measuring, Checking Precision, Medical Or Surgical Inst. And Apparatus Parts and Accessories etc.
7. Government has announced that it would open three medical devices parks. The 200 acre park is being established in Vishakhapatnam, by Government of Andhra Pradesh. Similarly, the Maharashtra Government is considering a 200 acre park in Mihan, Nagpur, Maharashtra
8. The Department of Commerce and EEPIC India is organizing series of Technology Meets across major engineering exports clusters in year 2016-17. Some of the major medical devices manufacturing clusters like Ahmedabad, Rajkot, Bangalore, Delhi NCR etc also covered in the planned calendar of meets. The engineering enterprises of these clusters are being provided platform to connect with the leading R&D Labs and strengthen their manufacturing and export capabilities.

Illustration of Book Building Process and Price Discovery Process (Investors should note that this example is solely for illustrative purposes and is not specific to the Issue and also excludes bidding by Anchor Investors)

Bidders can bid at any price within the Price Band. For instance, assume a price band of Rs. 20 to Rs. 24 per equity share, issue size of 3,000 equity shares and receipt of five bids from bidders, details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the bidding centres during the bidding period. The illustrative book below shows the demand for the equity shares of the issuer company at various prices and is collated from bids received from various investors.

Bid Quantity	Bid Amount (Rs.)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%

2,000	21	5,000	166.67%

INTRODUCTION TO INDIAN HEALTHCARE INDUSTRY

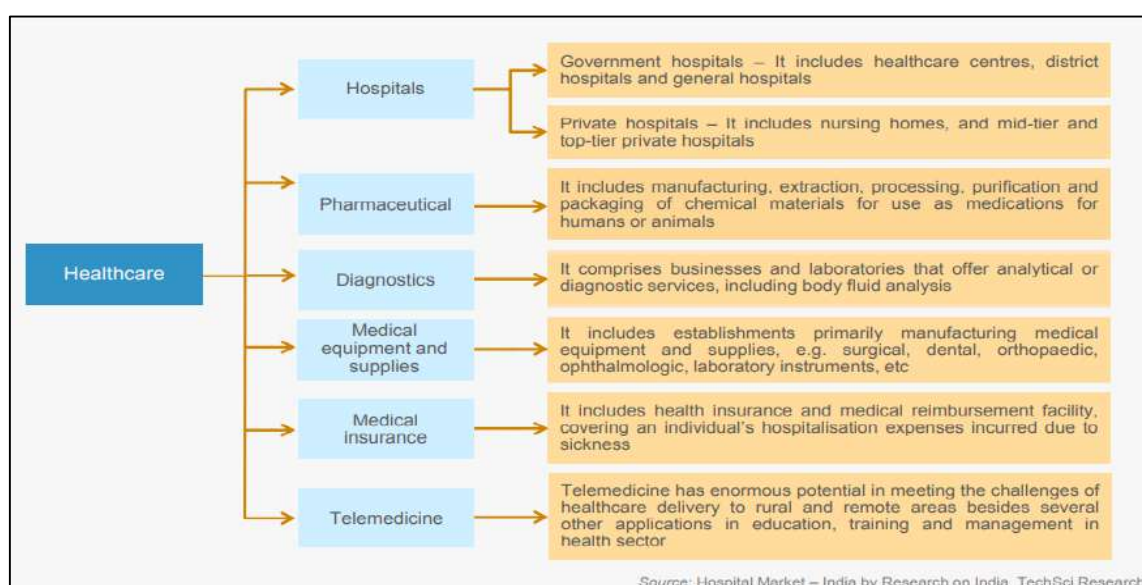

The Indian healthcare sector is expected to register a compound annual growth rate (CAGR) of 22.9 per cent during 2015-20 to US\$ 280 billion. Rising income level, greater health awareness, increased prevalence of lifestyle diseases and improved access to insurance would be the key contributors to growth.

The private sector has emerged as a vibrant force in India's healthcare industry, lending it both national and international repute. It accounts for almost 74 per cent of the country's total healthcare expenditure. Telemedicine is a fast-emerging trend in India; major hospitals (Apollo, AIIMS, Narayana Hrudayalaya) have adopted telemedicine services and entered into a number of public-private partnerships (PPP). Further, presence of world-class hospitals and skilled medical professionals has strengthened India's position as a preferred destination for medical tourism. Further investment in healthcare infrastructure is set to rise, benefiting both 'hard' (hospitals) and 'soft' (R&D, education) infrastructure.

In October 2017, All India Institute of Ayurveda (AIIA) was inaugurated in New Delhi which will bring synergy between the traditional wisdom of Ayurveda and modern diagnostic tools and technology.

The Government of India aims to develop India as a global healthcare hub. It has created the National Health Mission (NHM) for providing effective healthcare to both the urban and rural population. The Government is also providing policy support in the form of reduced excise and customs duty, and exemption in service tax, to support growth in healthcare.

GLOBAL ECONOMIC OVERVIEW

For India, three external developments are of significant consequence. In the short run, the change in the outlook for global interest rates as a result of the US elections and the implied change in expectations of US fiscal and monetary policy will impact on India's capital flows and exchange rates. Markets are factoring in a regime change in advanced countries, especially US macroeconomic policy, with high expectations of fiscal stimulus and unwavering exit from unconventional monetary policies. The end of the 20-year bond rally and end to the corset of deflation and deflationary expectations are within sight. Second, the medium-term political outlook for globalisation and in particular for the world's "political carrying capacity for globalisation" may have changed in the wake of recent developments. In the short run a strong dollar and declining competitiveness might exacerbate the lure of protectionist policies. These follow on on-going trends— documented widely— about stagnant or declining trade at the global level. This changed outlook will affect India's export and growth prospects

Third, developments in the US, especially the rise of the dollar, will have implications for China's currency and currency policy. If China is able to successfully re-balance its economy, the spill over effects on India and the rest of the world will be positive. On, the other hand, further declines in the yuan, even if dollar-induced, could interact with underlying vulnerabilities to create disruptions in

China that could have negative spill overs for India. For China, there are at least two difficult balancing acts with respect to the currency. Domestically, a declining currency (and credit expansion) props up the economy in the short run but delay rebalancing while also adding to the medium term challenges. Internationally, allowing the currency to weaken in response to capital flight risks creating trade frictions but imposing capital controls discourages FDI and undermines China’s ambitions to establish the Yuan as a reserve currency. China with its underlying vulnerabilities remains the country to watch for its potential to unsettle the global economy.

REVIEW OF MAJOR DEVELOPMENTS IN INDIAN ECONOMY

The Indian economy has continued to consolidate the gains achieved in restoring macroeconomic stability. Real GDP growth in the first half of the year was 7.2 percent, on the weaker side of the 7.0-7.75 per cent projection in the Economic Survey 2015-16 and somewhat lower than the 7.6 percent rate recorded in the second half of 2015-16 (Figure 1a). The main problem was fixed investment, which declined sharply as stressed balance sheets in the corporate sector continued to take a toll on firms’ spending plans. On the positive side, the economy was buoyed by government consumption, as the 7th Pay Commission salary recommendations were implemented, and by the long-awaited start of an export recovery as demand in advanced countries began to accelerate. Nominal GDP growth recovered to respectable levels, reversing the sharp and worrisome dip that had occurred in the first half of 2015-16 (Figure 1b).

The major highlights of the sectoral growth outcome of the first half of 2016-17 were: (i) moderation in industrial and nongovernment service sectors; (ii) the modest pick-up in agricultural growth on the back of improved monsoon; and (iii) strong growth in public administration and defence services— dampeners on and catalysts to growth almost balancing each other and producing a real Gross Value Addition (GVA) growth (7.2 percent), quite similar to the one (7.1 per cent) in H2 2015-16 (Figure 1b).

Inflation this year has been characterized by two distinctive features. The Consumer Price Index (CPI)-New Series inflation, which averaged 4.9 per cent during April-December 2016, has displayed a downward trend since July when it became apparent that kharif agricultural production in general, and pulses in particular would be bountiful. The decline in pulses prices has contributed substantially to the decline in CPI inflation which reached 3.4 percent at end-December. The second distinctive feature has been the reversal of WPI inflation, from a trough of (-)5.1 percent in August 2015 to 3.4 percent at end-December 2016, on the back of rising international oil prices. The wedge between CPI and WPI inflation, which had serious implications for the measurement of GDP discussed in MYEA (Box 3, Chapter 1, MYEA 2015-16), has narrowed considerably. Core inflation has, however, been more stable, hovering around 4.5 percent to 5 percent for the year so far. The outlook for the year as a whole is for CPI inflation to be below the RBI’s target of 5 percent, a trend likely to be assisted by demonetisation.

External Sector

Similarly, the external position appears robust having successfully weathered the sizeable redemption of Foreign Currency Non-Resident (FCNR) deposits in late 2016, and the volatility associated with the US election and demonetisation. The current account deficit has declined to reach about 0.3

percent of GDP in the first half of FY2017. Foreign exchange reserves are at comfortable levels, having risen from around US\$350 billion at end-January 2016 to US\$ 360 billion at end-December 2016 and are well above standard norms for reserve adequacy. In part, surging net FDI inflows, which grew from 1.7 percent of GDP in FY2016 to 3.2 percent of GDP in the second quarter of FY2017, helped the balance-of-payments

The trade deficit declined by 23.5 per cent in April-December 2016 over corresponding period of previous year. During the first half of the fiscal year, the main factor was the contraction in imports, which was far steeper than the fall in exports. But during October- December, both exports and imports started a long-awaited recovery, growing at an average rate of more than 5 per cent. The improvement in exports appears to be linked to improvements in the world economy, led by better growth in the US and Germany. On the import side, the advantage on account of benign international oil prices has receded and is likely to exercise upward pressure on the import bill in the short to medium term. Meanwhile, the net services surplus declined in the first half, as software service exports slowed and financial service exports declined. Net private remittances declined by \$4.5 bn in the first half of 2016-17 compared to the same period of 2015-16, weighed down by the lagged effects of the oil price decline, which affected inflows from the Gulf region.

Fiscal Position

Trends in the fiscal sector in the first half have been unexceptional and the central government is committed to achieving its fiscal deficit target of 3.5 percent of GDP this year. Excise duties and services taxes have benefitted from the additional revenue measures introduced last year. The most notable feature has been the over-performance (even relative to budget estimates) of excise duties in turn based on buoyant petroleum consumption: real consumption of petroleum products (petrol) increased by 11.2 percent during April-December 2016 compared to same period in the previous year. Indirect taxes, especially petroleum excises, have held up even after demonetisation in part due to the exemption of petroleum products from its scope. More broadly, tax collections have held up to a greater extent than expected possibly because of payment of dues in demonetised notes was permitted. Non-tax revenues have been challenged owing to shortfall in spectrum and disinvestment receipts but also to forecast optimism; the stress in public sector enterprises has also reduced dividend payments.

State government finances are under stress. The consolidated deficit of the states has increased steadily in recent years, rising from 2.5 percent of GDP in 2014-15 to 3.6 percent of GDP in 2015-16, in part because of the UDAY scheme. The budgeted numbers suggest there will be an improvement this year. However, markets are anticipating some slippage, on account of the expected growth slowdown, reduced revenues from stamp duties, and implementation of their own Pay Commissions. For these reasons, the spread on state bonds over government securities jumped to 75 basis points in the January 2017 auction from 45 basis points in October 2016. For the general government as a whole, there is an improvement in the fiscal deficit with and without UDAY scheme.

OUTLOOK FOR 2016-17

This year's outlook must be evaluated in the wake of the November 8 action to demonetize the high denomination notes. But it is first important to understand the analytics of the demonetisation shock in the short run. Demonetisation affects the economy through three different channels. It is potentially: 1) an aggregate demand shock because it reduces the supply of money and affects private wealth, especially of those holding unaccounted money; 2) an aggregate supply shock to the extent that economic activity relies on cash as an input (for example, agricultural production might be affected since sowing requires the use of labour traditionally paid in cash); and 3) an uncertainty shock because economic agents face imponderables related to the magnitude and duration of the cash shortage and the policy responses (perhaps causing consumers to defer or reduce discretionary consumption and firms to scale back investments).

Demonetisation is also very unusual in its monetary consequences. It has reduced sharply, the supply of one type of money— cash—while increasing almost to the same extent another type of money— demand deposits. This is because the demonetized cash was required to be deposited in the banking system. In the third quarter of FY2017 (when demonetisation was introduced), cash declined by 9.4 percent, demand deposits increased by 43 percent, and growth in the sum of the two by 11.3 percent.

The price counterparts of this unusual aspect of demonetisation are the surge in the price of cash (inferred largely through queues and restrictions), on the one hand; and the decline in interest rates on the lending rate (based on the marginal cost of funds) by 90 basis points since November 9; on deposits (by about 25 basis points); and on g-secs on the other (by about 32 basis points).

There is yet another dimension of demonetisation that must be kept in mind. By definition, all these quantity and price impacts will self-correct by amounts that will depend on the pace at which the economy is remonetized and policy restrictions eased. As this occurs, consumers will run down their bank deposits and increase their cash holdings. Of course, it is possible, even likely that the self-correction will not be complete because in the new equilibrium, aggregate cash holdings (as a share of banking deposits and GDP) are likely to be lower than before.

Anecdotal and other survey data abound on the impact of demonetisation. But we are interested in a macro-assessment and hence focus on five broad indicators: Agricultural (Rabi) sowing; Indirect tax revenue, as a broad gauge of production and sales; Auto sales, as a measure of discretionary consumer spending and two-wheelers, as the best indicator of both rural and less affluent demand; Real credit growth; and Real estate prices. Contrary to early fears, as of January 15, 2017 aggregate sowing of the two major rabi crops—wheat and pulses (gram)—exceeded last year's planting by 7.1 percent and 10.7 percent, respectively. Favourable weather and moisture conditions presage an increase in production. To what extent these favourable factors will be attenuated will depend on whether farmers' access to inputs—fertilizer, credit, and labour—was affected by the cash shortage.

To estimate a demonetisation effect, one needs to start with the counterfactual. Our best estimate of growth in the absence of demonetisation is 11¼ percent in nominal terms (slightly higher than last year's Survey forecast because of the faster rebound in WPI inflation, but lower than the CSO's advance estimate of 11.9 percent) and 7 percent in real terms (in line with both projections).

Finally, demonetisation will afford an interesting natural experiment on the substitutability between cash and other forms of money. Demonetisation has driven a sharp and dramatic wedge in the supply of these two: if cash and other forms are substitutable, the impact will be relatively muted; if, on the other hand, cash is not substitutable the impact will be greater.

OUTLOOK FOR 2017-18

Turning to the outlook for 2017-18, we need to examine each of the components of aggregate demand: exports, consumption, private investment and government.

As discussed earlier, India's exports appear to be recovering, based on an uptick in global economic activity. This is expected to continue in the aftermath of the US elections and expectations of a fiscal stimulus. The IMF's January update of its World Economic Outlook forecast is projecting an increase in global growth from 3.1 percent in 2016 to 3.4 percent in 2017, with a corresponding increase in growth for advanced economies from 1.6 percent to 1.9 percent. Given the high elasticity of Indian real export growth to global GDP, exports could contribute to higher growth next year, by as much as 1 percentage point.

The outlook for private consumption is less clear. International oil prices are expected to be about 10-15 percent higher in 2017 compared to 2016, which would create a drag of about 0.5 percentage points. On the other hand, consumption is expected to receive a boost from two sources: catch-up after the demonetisation-induced reduction in the last two quarters of 2016-17; and cheaper borrowing costs, which are likely to be lower in 2017 than 2016 by as much as 75 to 100 basis points. As a result, spending on housing and consumer durables and semi-durables could rise smartly. It is too early to predict prospects for the monsoon in 2017 and hence agricultural production. But the higher is agricultural growth this year, the less likely that there would be an extra boost to GDP growth next year.

Since no clear progress is yet visible in tackling the twin balance sheet problem, private investment is unlikely to recover significantly from the levels of FY2017. Some of this weakness could be offset through higher public investment, but that would depend on the stance of fiscal policy next year, which has to balance the short-term requirements of an economy recovering from demonetisation against the medium-term necessity of adhering to fiscal discipline—and the need to be seen as doing so. Putting these factors together, we expect real GDP growth to be in the 6¾ to 7½ percent range in FY2018. Even under this forecast, India would remain the fastest growing major economy in the world.

There are three main downside risks to the forecast. First, the extent to which the effects of demonetisation could linger into next year, especially if uncertainty remains on the policy response. Currency shortages also affect supplies of certain agricultural products, especially milk (where procurement has been low), sugar (where cane availability and drought in the southern states will restrict production), and potatoes and onions (where sowings have been low). Vigilance is essential to prevent other agricultural products becoming in 2017-18 what pulses were in 2015-16.

Second, geopolitics could take oil prices up further than forecast. The ability of shale oil production to respond quickly should contain the risks of a sharp increase, but even if prices rose merely to \$60-65/barrel the Indian economy would nonetheless be affected by way of reduced consumption; less room for public investment; and lower corporate margins, further denting private investment. The scope for monetary easing might also narrow, if higher oil prices stoked inflationary pressure.

Third, there are risks from the possible eruption of trade tensions amongst the major countries, triggered by geo-politics or currency movements. This could reduce global growth and trigger capital flight from emerging markets. The one significant upside possibility is a strong rebound in global demand and hence in India's exports. There are some nascent signs of that in the last two quarters. A strong export recovery would have broader spill over effects to investment.

Fiscal outlook

The fiscal outlook for the central government for next year will be marked by three factors. First, the increase in the tax to GDP ratio of about 0.5 percentage points in each of the last two years, owing to the oil windfall will disappear. In fact, excise-related taxes will decline by about 0.1 percentage point of GDP, a swing of about 0.6 percentage points relative to FY2017.

Second, there will be a fiscal windfall both from the high denomination notes that are not returned to the RBI and from higher tax collections as a result of increased disclosure under the Pradhan Mantra Garib Kalyan Yojana (PMGKY). Both of these are likely to be one-off in nature, and in both cases the magnitudes are uncertain.

A third factor will be the implementation of the GST. It appears that the GST will probably be implemented later in the fiscal year. The transition to the GST is so complicated from an administrative and technology perspective that revenue collection will take some time to reach full potential. Combined with the government's commitment to compensating the states for any shortfall in their own GST collections (relative to a baseline of 14 percent increase), the outlook must be cautious with respect to revenue collections. The fiscal gains from implementing the GST and demonetisation, while almost certain to occur, will probably take time to be fully realized. In addition, muted non-tax revenues and allowances granted under the 7th Pay Commission could add to pressures on the deficit.

The macroeconomic policy stance for 2017-18

An economy recovering from demonetisation will need policy support. On the assumption that the equilibrium cash-GDP ratio will be lower than before November 8, the banking system will benefit from a higher level of deposits. Thus, market interest rates—deposits, lending, and yields on g-secs—should be lower in 2017-18 than 2016-17. This will provide a boost to the economy (provided, of course, liquidity is no longer a binding constraint). A corollary is that policy rates can be lower not necessarily to lead and nudge market rates but to validate them. Of course, any sharp uptick in oil prices and those of agricultural products, would limit the scope for monetary easing.

Fiscal policy is another potential source of policy support. This year the arguments may be slightly different from those of last year in two respects. Unlike last year, there is more cyclical weakness on account of demonetisation. Moreover, the government has acquired more credibility because of posting steady and consistent improvements in the fiscal situation for three consecutive years, the central government fiscal deficit declining from 4.5 percent of GDP in 2013-14 to 4.1 percent, 3.9 percent, and 3.5 percent in the following three years. But fiscal policy needs to balance the cyclical imperatives with medium term issues relating to prudence and credibility.

One key question will be the use of the fiscal windfall (comprising the unreturned cash and additional receipts under the PMGKY) which is still uncertain. Since the windfall to the public sector is both one off and a wealth gain not an income gain, it should be deployed to strengthening the government's balance sheet rather than being used for government consumption, especially in the form of programs

that create permanent entitlements. In this light, the best use of the windfall would be to create a public sector asset reconstruction company so that the twin balance sheet problem can be addressed, facilitating credit and investment revival; or toward the compensation fund for the GST that would allow the rates to be lowered and simplified; or toward debt reduction. The windfall should not influence decisions about the conduct of fiscal policy going forward.

Perhaps the most important reforms to boost growth will be structural. In addition to those spelt out in Section 1—strategic disinvestment, tax reform, subsidy rationalization—it is imperative to address directly the twin balance sheet problem. The problem is large, persistent and difficult, will not correct itself even if growth picks up and interest rates decline, and current attempts have proved grossly inadequate. It may be time to consider something like a public sector asset reconstruction company.

Another area of reform relates to labour. Given the difficulty of reforming labor laws per se, the thrust could be to move towards affording greater choice to workers which would foster competition amongst service providers. Choices would relate to: whether they want to make their own contribution to the Employees’ Provident Fund Organisation (EPFO); whether the employers’ contribution should go to the EPFO or the National Pension Scheme; and whether to contribute to the Employee State Insurance (ESI) or an alternative medical insurance program. At the same time, there could be a gradual move to ensure that at least compliance with the central labour laws is made paperless, presence less, and cashless. One radical idea to consider is the provision of a universal basic income. But another more modest proposal worth embracing is procedural: a standstill on new government programs, a commitment to assess every new program only if it can be shown to demonstrably address the limitations of an existing one that is similar to the proposed one; and a commitment to evaluate and phase down existing programs that are not serving their purpose.

GLOBAL MANUFACTURING SECTOR

World Manufacturing Growth in quarter II, 2017

World manufacturing in the second quarter of 2017 has continued to show signs of expansion, following an upward trend observed throughout 2016 and improved growth rates in the first quarter of 2017. Both industrialized and developing and emerging industrial economies gained further strength in manufacturing production and confirmed their healthy dynamic growth.

Although the pace of growth indicates similar trends in both country groups (Figure 2), developing economies continuously performed better than industrialized ones. The current growth prospects are improving further on account of rising consumer spending and promising investment plans, which are favourably directed towards developing economies. Changing business conditions are driving industrial production growth and confidence for the overall outlook has been increasing. Moreover, the risks for global growth witnessed last year, such as political instability in Europe, unpredictability of the Brexit aftermath, the rising trade protectionism following the US election and an abrupt slowdown in China have certainly diminished, although they have not disappeared completely.

(Source: World Manufacturing Production, Statistics for Quarter II, 2017, United Nations Industrial Development Organization, www.unido.org)

Optimistic results reported in the first quarter have carried over into the second quarter of this year. Global manufacturing output rose by 4.2 per cent in the second quarter of 2017 compared to the same period of the previous year, building on the robust 3.7 per cent increase observed at the beginning of 2017. The major industrialized economies with a significant share in global manufacturing output, namely the United States, Japan, Germany, Italy and France, thrived in the second quarter of 2017. The growth prospects of China, the world's largest manufacturer, remained unchanged.

As depicted in Figure 2, steady progress over several consecutive quarters characterizes all country groups and the prospects for sustained global industrial growth in the coming periods are good.

Manufacturing Growth in Industrialized economies

The manufacturing output growth of industrialized economies has progressively been improving over the last quarters. The upward growth trend-at a relatively moderate pace-is attributable to the robust dynamics in all industrialized regions, namely East Asia, Europe and North America.

The manufacturing sector gained increasing strength due to domestic and external demand in European economies and resulted in the solid performance recorded in the second quarter of 2017. Europe's manufacturing output jumped to 2.7 per cent in the second quarter of 2017 from 1.6 per cent growth in the previous quarter, while the growth rate in the Eurozone witness the same development during the second quarter of 2017 (Figure 3).

The disaggregated data points to continued improvement in the already healthy economic momentum of leading eurozone economies with growth rates of 2.9 per cent in Germany and Italy, and 2.4 per cent in France and Spain compared to year-to-year developments. The manufacturing production in other economies of the single currency block seemingly remained healthy in the second quarter. Strong growth of over 8.0 per cent was observed in Slovenia. and Estonia, while a fairly robust growth rate was recorded in the Netherlands (3.0 per cent), Austria (3.5 per cent), Belgium (4.2 per cent) and Finland (3.2 per cent). The manufacturing sector in the eurozone ended the second quarter on a strong note. The only exception was Ireland, where manufacturing output fell by 1.1 percent compared to the same period of the previous year.

Taking a closer look at individual countries beyond the eurozone, manufacturing output remained stagnant in the United Kingdom at only 0.2 per cent growth in the second quarter of 2017. Despite remaining in positive terrain, output dipped significantly considering that the previous quarter's result was the highest one in over two years. On the other hand, the pace of growth in Czechia and Hungary strengthened, where an increase of 7.4 per cent and 4.7 percent was recorded, respectively. Other exceptionally positive results were visible in Switzerland with a 2.4 per cent growth rate as well as in Sweden with a gain of 5.2 per cent compared to the same period of the previous year. Among the other Nordic countries, Denmark expanded its manufacturing production by 3.7 per cent, while Norway significantly moderated its contraction rate to roughly 0.4 per cent.

North America's overall manufacturing production grew by 1.6 per cent compared to the same period of 2016. The strengthening of the dollar and the consequent weak demand for U.S. goods caused the American manufacturing sector to go into recession in late 2015. However, the recent weakening of the U.S. dollar combined with a stronger global environment resulted in the opposite effect, and American total manufacturing output rose by 1.5 per cent compared to the same period of the previous year, representing the highest increase since the last recession. Improved performance was also witnessed in Canadian manufacturing, where manufacturing production expanded by 3.5 per cent in the second quarter of 2017.

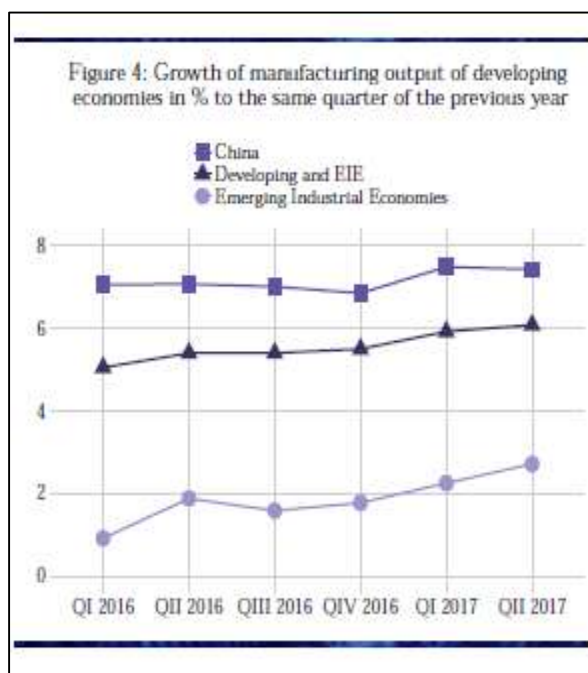

Another positive result was observed in industrialized East Asian economies in the second quarter of 2017 - a 4.4 per cent improvement compared to the same period of the previous year. The main forces that have been driving growth in Japan's manufacturing sector in recent quarters remained firmly in place in the second quarter of 2017. Japan, the major force behind the entire region's upward trend, reconfirmed the end of a long period of contractions with a growth rate of nearly 5.8 per cent. The Republic of Korea's manufacturing production, on the other hand, remained almost unchanged compared to the same period of the previous year. Malaysia's total manufacturing output recorded a 5.9 per cent rise in the second quarter of 2017; a very strong growth rate of 8.5 per cent was observed in Singapore. The manufacturing production of Taiwan, Province of China lost some steam in the second quarter of 2017 according to the latest figures, although it still expanded at a moderate 2.6 per cent pace on a year-to-year basis.

Manufacturing sector growth in Developing and emerging industrial economies

The second quarter of 2017 brought upward trends for all developing and emerging industrial regions. Latin America is continuing on the path to full recovery from last year's weak performance, Asian economies continue to prosper and production in Africa is profiting from boosted investor confidence. Stronger foreign demand is helping support manufacturing activity in China. Together with an improvement in domestic demand and support for the development of advanced manufacturing industries, this translated into a 7.4 per cent increase in total manufacturing production in China compared to the same period of the previous year.

Latin American economies have overcome a severe decline in economic growth, which affected the region for a long period with a 1.8 per cent upsurge in the second quarter of 2017 in a year-to-year comparison. Brazilian manufacturers are slowly emerging from the deep recession during which manufacturing production contracted at the beginning of 2014 and shrank uninterruptedly until early 2017. This steep fall was softened by a mild, but ultimately positive upward trend of 0.4 per cent recorded in the second quarter of 2017. Moreover, data for the second quarter of 2017 suggest that the recovery is finally gathering pace in Argentina's manufacturing sector. The country's manufacturing activity recorded a growth of 1.9 per cent - its best performance over the last five years. Production was driven by a broad-based expansion, with the food, automotive and metallurgic Industries. leading the way.

The positive momentum of manufacturing production in Mexico, the region's powerhouse, was largely retained with a positive increase of nearly 3.9 per cent. Looking at the other countries in the region, Chile recorded a minor upturn of 0.9 per cent, whereas manufacturing output in Colombia remained stagnant compared to the same period of 2016.

The Asia and the Pacific region saw an increase of 6.6 per cent in manufacturing output during the second quarter of 2017. Viet Nam, one of Asia's fast growing economies, maintained a solid growth rate of 11.1 per cent, continuing its long-term trajectory of double-digit year-to-year growth in manufacturing. On the other hand, a subdued export performance dampened the momentum in Indonesia, resulting in the country's manufacturing sector expanding by 3.8 per cent, a slight deceleration compared to the 4.5 per cent average growth rate in 2016. India's manufacturing production expanded by 1.8 per cent in the second quarter of 2017. Very positive developments in growth were also observed in the Philippines, Pakistan, Kazakhstan and Mongolia. In Thailand, the weak performance of manufacturing production in the first quarter continued into the second quarter

of 2017, and the manufacturing sector recorded a 0.1 per cent loss compared to the second quarter of the previous year.

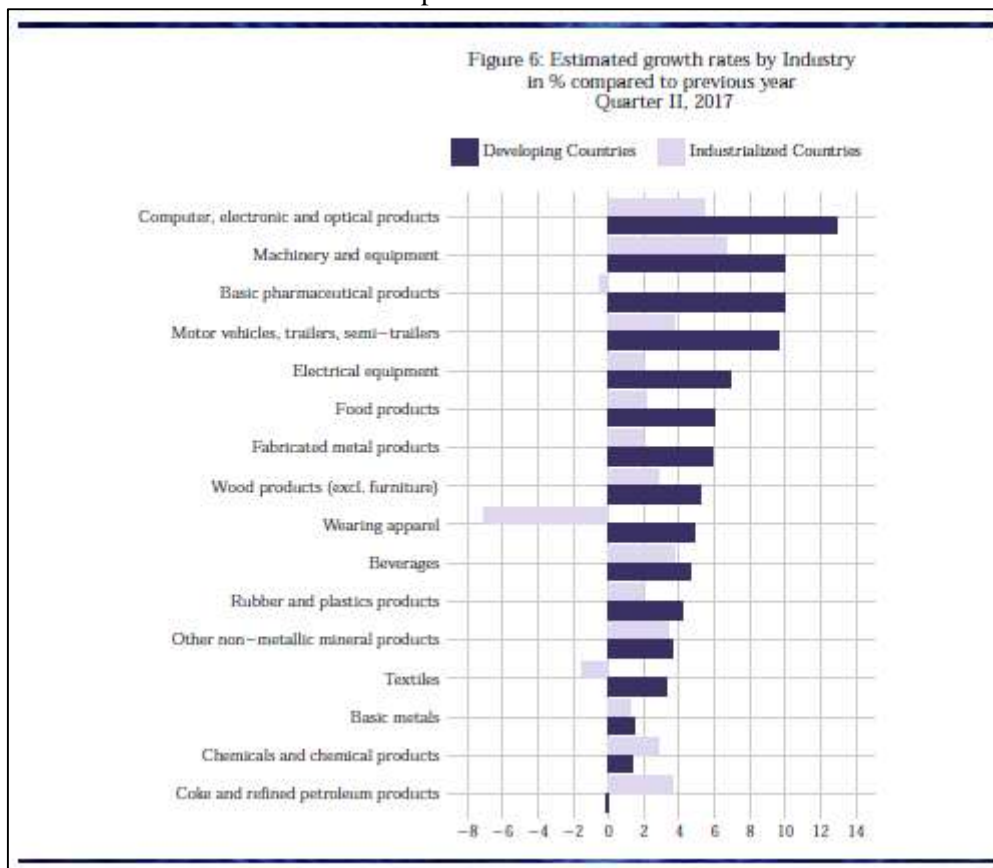

According to UNIDO estimates, Africa's manufacturing output increased to 10.5 per cent in the second quarter of 2017, however, it should be noted that estimates for Africa are based on limited data revealing high instability and volatility. A two-digit growth rate was registered in Egypt; Cote d'Ivoire only barely missed a two-digit growth rate, Morocco experienced a 2.3 per cent growth, while Senegal's and Tunisia's manufacturing output dropped by 3.0 per cent and 0.4 per cent, respectively, compared to the same period of the previous year. South Africa, the region's most industrialized economy, saw a contraction rate of 1.7 per cent in the second quarter of 2017, the third quarter of depressed manufacturing production in a row. Weak manufacturing together with a shrinking trade sector, uncertain political landscape and stunted investment signalizes potentially dim prospects, and perhaps not only for 2017.

Among other developing economies, the manufacturing output of Eastern European countries achieved relatively higher growth rates. Manufacturing output rose by 6.2 per cent in Poland, 10.6 per cent in Romania, 8.5 per cent in Bulgaria, 6.0 per cent in Serbia and 8.7 per cent in Latvia. Turkey's manufacturing sector also performed well, growing by 4.7 percent due to healthy export growth fueled by a weaker lira. Greek manufacturing marked 2.5 per cent growth in the second quarter of 2017 over the same period of 2016.

MANUFACTURING SECTOR IN INDIA

Introduction

Manufacturing has emerged as one of the high growth sectors in India. Prime Minister of India, Mr Narendra Modi, had launched the 'Make in India' program to place India on the world map as a manufacturing hub and give global recognition to the Indian economy.

Investments

With the help of Make in India drive, India is on the path of becoming the hub for hi-tech manufacturing as global giants such as GE, Siemens, HTC, Toshiba, and Boeing have either set up or are in process of setting up manufacturing plants in India, attracted by India's market of more than a billion consumers and increasing purchasing power.

Cumulative Foreign Direct Investment (FDI) in India's manufacturing sector reached US\$ 70.51 billion by June 2017.

India has become one of the most attractive destinations for investments in the manufacturing sector. Some of the major investments and developments in this sector in the recent past are:

- JSW Energy has signed a memorandum of understanding (MoU) with the Government of Gujarat, for setting up an electric vehicle (EV) manufacturing unit in Gujarat at an estimated cost of Rs 4,000 crore (US\$ 608.88 million).
- With an aim to increase its presence in India, Denmark-based heating ventilation and air-conditioning (HVAC) giant, Danfoss, is planning to take its manufacturing localisation to 50 per cent as well as double its supplier base in India by 2020.
- Cochin Shipyard Ltd, which recently completed its initial public offer (IPO), will utilize the funds from the issue to implement expansion projects worth Rs 2,800 crore (US\$ 437.3 million), which are already in its pipeline.
- Indian biscuits giant, Britannia Industries Ltd (BIL), is setting up its largest plant ever, in Ranjangaon, Maharashtra, with an investment of Rs 1,000 crore (US\$ 156.89 million). The plant will have an annual capacity of 120,000 tonne and will be completed by FY19.
- IKEA, a Swedish furniture company, aims to manufacture more than 30 per cent of its products in India in the coming years, stated Mr Patrik Antoni, Deputy Country Manager, IKEA.
- Volvo India Pvt Ltd, Swedish luxury car manufacturer, will start assembly operations near Bengaluru in India by the end of 2017. The company is targeting to double its share in India's luxury car segment to 10 per cent by 2020
- Larsen & Toubro (L&T) has bagged a contract worth US\$ 669.34 million from the Ministry of Defence, Government of India, to supply 100 artillery of 155mm/52 caliber tracked self-propelled guns for the Indian Army, under the Make in India initiative.
- Berger Paints has entered into a partnership with Chugoku Marine Paints (CMP), thereby marking its entry into the marine paints segment, which has an estimated market size of Rs 250 crore (US\$ 38.82 million) and is expected to grow at 25 per cent annually for the next five years.
- SAIC Motor'Corp, China's largest automaker, has signed a deal to buy General Motors (GM) India's Halol plant in Gujarat.
- Dabur India Ltd set up its largest manufacturing plant globally, spread over 30 acres, at a cost of Rs 250 crore (US\$ 38.82 million), in Tezpur, Assam, which will produce Dabur's complete range of ayurvedic medicines, health supplements, and personal care products among others.
- Apple Inc is looking to expand its Taiwanese contract manufacturer, Wistron's, production facility in Bengaluru, India, where it started manufacturing iPhone SE in May, 2017.
- China based LCD and touchscreen panel manufacturer, Holitech Technology, has announced plans to investing up to US\$ 1 billion in India by the end of 2017.
- Tristone Flowtech Group, the Germany-based flow technology systems specialist, has set up a new facility in Pune, which will manufacture surge tank as well as engine cooling and

aircharge hose for the Indian market. The company plans to start the production at the plant in the fourth quarter of 2017.

- Honda Motorcycle & Scooter India plans to invest around Rs 600 crore (US\$ 90 million) to add a new line to produce additional 600,000 units at its Narsapura facility in Karnataka.
- Hindustan Coca-Cola Beverages plans to set up a bottling plant with an investment of Rs 750 crore (US\$ 112.5 million) in phases at the first industrial area being developed by Government of Madhya Pradesh under the public private partnership in Babai village of Hoshangabad, Bhopal.
- Tata Advanced Systems is collaborating with the world's largest defence contractor Lockheed Martin to manufacture the F-16 fighter jets in India.

Government Initiatives

In a bid to push the 'Make in India' initiative to the global level, Mr Narendra Modi, Prime Minister of India, pitched India as a manufacturing destination at the World International Fair in Germany's Hannover in 2015. Mr Modi showcased India as a business friendly destination to attract foreign businesses to invest and manufacture in the country.

The Government of India has taken several initiatives to promote a healthy environment for the growth of manufacturing sector in the country. Some of the notable initiatives and developments are:

- The Government of India has introduced several policy measures in the Union Budget 2017-18 to provide impetus to the manufacturing sector. Some of which include reduction of income tax rate to 25 per cent for MSME companies having turnover up to Rs 50 crore (US\$ 7.5 million), MAT credit carry forward extended to 15 years from 10 years and abolishment of Foreign Investment Promotion Board (FIPB) by 2017-18.
- The Government of India has launched a phased manufacturing programme (PMP) aimed at adding more smartphone components under the Make in India initiative thereby giving a push to the domestic manufacturing of mobile handsets.

Road Ahead

India is an attractive hub for foreign investments in the manufacturing sector. Several mobile phone, luxury and automobile brands, among others, have set up or are looking to establish their manufacturing bases in the country.

The manufacturing sector of India has the potential to reach US\$ 1 trillion by 2025 and India is expected to rank amongst the top three growth economies and manufacturing destination of the world by the year 2020. The implementation of the Goods and Services Tax (GST) will make India a common market with a GDP of US\$ 2 trillion along with a population of 1.2 billion people, which will be a big draw for investors.

With impetus on developing industrial corridors and smart cities, the government aims to ensure holistic development of the nation. The corridors would further assist in integrating, monitoring and developing a conducive environment for the industrial development and will promote advance practices in manufacturing.

The Indian Surgical Equipments, Medical Devices & Pharmaceutical Machineries Industry

The Indian medical devices industry is currently valued at around US\$ 5 billion which is 2% of the US\$ 250 billion industry. The overall healthcare industry in India is valued at USD 90 Billion which is expected to reach US\$ 220 billion by the year 2020. Thus India's medical devices, surgical equipment and pharmaceutical industry is poised to grow significantly in the coming years and emerge cost effective supplier of the products to the whole world.

The Indian surgical equipment, medical device and pharmaceutical machinery industry is fragmented with close to 1,800 domestic firms who are predominantly MSMEs, primarily competing in the range of low to medium technology products. However, in recent years there has been a paradigm shift in the manufacturing landscape and which now have expanded for producing more cost-effective to number high end products including hi tech R&D and testing in the sector. The domestic market caters to low-value disposables and supplies space, whereas importers dominate the costly and high end medical equipments with extensive service networks

The Indian medical devices industry is a sunrise segment in the healthcare space. With focus on technology, innovation and a conducive regulatory framework, this sector will attract investments from the private sector. This would help Indian companies to become originators rather than traders.

International companies in this field are also using India as a manufacturing base by either setting up facilities of their own or by acquiring domestic manufacturers. Some examples include 3 M's manufacturing plant in Pune, Becton Dickinson's manufacturing facility in Haryana, Hollister's setting up manufacturing facility in India and Philips Medical Systems' acquisition of Medtronics and Alpha X-Ray Technologies.

Some examples include 3 M's manufacturing plant in Pune, Becton Dickinson's manufacturing facility in Haryana, Hollister's setting up manufacturing facility in India and Philips Medical Systems' acquisition of Medtronics and Alpha X-Ray Technologies.

Recent initiatives taken by the Government of India are:

The Government has launched voluntary scheme 'ICMED' or Indian Certification of Medical Devices to bring international respect to medical devices which are made in India.

1. With effect from January 1, 2016 the Government has scrapped the requirements of obtaining a 'No Objection Certificate' from the Ministry of Health for exports meant to developed countries. This is because these nations have scrutiny mechanism before importing from India, and since our exporters take due approvals from importing countries, this additional information is not required.
2. 100% FDI has been allowed in order to promote world class manufacturing and enhance competencies in the local manufacturing. Existing companies or setting up of new companies are allowed to bring FDI under automatic route in the medical devices sector. FDI inflow will spur R&D and manufacturing innovations, in turn increasing the efficiency and effectiveness

of medical electronic products. Advancement of medical electronic product quality and associated successful diagnostic rates are expected to create a spurt in adoption.

3. National Medical Device Policy 2015 focuses on R&D, testing and quality for domestic manufacturing.
4. The Government of India unveiled start-up policy aiming to encourage entrepreneurs in overall manufacture of goods and services. The policy in itself has covered significant benefits such as barriers to the entry have been diluted, a large corpus of seed funds have been earmarked, tax benefits have been extended and regulatory requirements have been significantly done away with.
5. To stimulate domestic manufacturing, the Government of India has announced (on 19th January 2016) withdrawal of earlier concessional import duty. Notification on Chapter 90 items and restricting this Concessional Duty to only 12 Medical Devices of this notification whereby the custom duties have been increased from 5% (0%) to 7.5% as earlier and SAD of 4% have been re-imposed on 67 items of the 117 items identified as Medical Devices.
6. In order to boost self-sustaining industry oriented R&D mechanism, the Ministry of Commerce and Industry has undertaken an initiative for technological upgradation for boosting engineering exports. Wherein, 34 products at 8 Digit HS Code tariff lines in the medical devices have been identified, having significant global export potential. These products are mainly related to Chapter 90 i.e Optical, Photographic Cinematographic Measuring, Checking Precision, Medical Or Surgical Inst. and Apparatus Parts and Accessories etc.
7. Government has announced that it would open three medical devices parks. The 200 acre park is being established in Vishakhapatnam, by Government of Andhra Pradesh. Similarly, the Maharashtra Government is considering a 200 acre park in Mihan, Nagpur, Maharashtra
8. The Department of Commerce and EEPIC India is organizing series of Technology Meets across major engineering exports clusters in year 2016-17. Some of the major medical devices manufacturing clusters like Ahmedabad, Rajkot, Bangalore, Delhi NCR etc also covered in the planned calendar of meets. The engineering enterprises of these clusters are being provided platform to connect with the leading R&D Labs and strengthen their manufacturing and export capabilities.

THE DISPOSABLE HYGIENE PRODUCTS INDUSTRY ANALYSIS IN INDIA

The disposable hygiene industry, coming under the market for personal care is also finally shaping up after a good shake up that has taken place in the last 3 years. Owing to the growing penetration levels in all product ranges of sanitary napkins, baby diapers, adult diapers, underpads and wipes, many domestic brands have sprung up in this market which is still dominated by the multinationals in most categories. But what is noteworthy is that in the last two to three years, notable and established domestic Indian companies have come up in this area with a long term vision and a good investment portfolio. The favorable government policies and awareness creation initiatives have acted as a catalyst in giving shape to many of their dreams and plans.

These companies are from diverse backgrounds, such as suppliers to the medical and healthcare industries, detergent companies, established pharmacies, textile houses and capital investors contract manufacturers etc.

A good proportion of the existing consumers are willing to try different products and also buy premium goods at higher prices. People are gracefully embracing Ayurveda products. Many converting companies are trying to increase their penetration in rural areas to generate more revenues from rural India and hook the non users first with their brands.

Another trend seen is that availability of products has become way more easier as the internet as a channel of sales is fast catching up now. It is foreseen that sales of the disposable hygiene products in India will be led by the online sales in times to come. E-commerce companies like Amazon are

strengthening their business in the FMCG sector, and as result many players are expanding into new geographies & categories. As the proportion of 'working age population' is increasing, the per capita income & GDP are expected to surge. Furthermore the introduction of GST as a unified tax regime will lead to a re-evaluation of procurement and distribution arrangements and a simpler tax structure to prevent interstate anomalies within the country. All positive pointers are directing the industry towards the inevitable. The disposable hygiene market in India, we can say has opened up and the coming decade will bring forth many trendsetting changes especially the setting up of domestic brands and the private label.

COTTON IN HYGIENE: Making an interesting Difference

Hygiene markets are growing around the world and cotton is growing with them. As GDP increases in developing economies more consumers will be able to afford hygiene products. As populations in developed countries grow older and live longer, markets for new products such as adult incontinence pads, liner and briefs, will grow and any stigma associated with buying and wearing these items will continue to recede.

Sustainability will continue to be increasingly important. Cotton's sustainability profile is strong:

- Cotton provides food as well as fiber. For every kg of fiber produced, the plant also produces 1.6 kg of seed which is used, as noted above for feed and oil.
- Cotton is grown on 3% of global agricultural land and uses 3% of global agricultural water.
- Cotton grown on 3% of global agricultural land satisfies approximately 30% of the world's demand for textile fiber.
- This crop is annually renewable
- Cotton provides income for farmers in
- approximately 80 countries.

Consumers know and love cotton. Cotton is trustworthy and authentic. From a health perspective, consumers know it is safe for all types of skin. From a marketing perspective, consumers don't need to be educated about cotton. Just knowing there is cotton in the product increases the perception of quality, value and intention to buy.

In the nonwovens industry, the expertise to process cotton grows every year along with cotton's market share. The options of cotton fibers also continues to expand with purified fiber, highly cleaned natural fiber and recycled fiber for carding technologies and shorter fibers for air laid and wet laid technologies. Furthermore, there are cottons which are hydrophilic and those which are hydrophobic. A blend of these two is used for channel moisture to an ADL while maintaining dryness against the skin.

R&D for cotton to be used in disposable hygiene products moving

Cotton's growing success around the world in hygiene products is due to the convergence of multiple factors:

- a) Demand for products that are safe and healthy for skin contact. Cotton is a natural fiber, favored by consumers for its softness, comfort and absorbency. It is also naturally hypoallergenic and therefore can be used by those who have the most sensitive skin.
- b) Sustainability: The demand for more sustainable products is being driven by supply chain partners as well as consumers. Cotton is favored for several reasons. It is annually renewable. It biodegrades under all conditions (composting, aerobic and anaerobic) as a part of a natural cycle. The plant provides food as well as fiber. The seeds are in high demand for dairy cattle feed as they help produce higher protein milk. Seeds are also pressed for cotton seed oil used in food products/ cooking.
- c) Converting machines can convert cotton or cotton blend nonwovens as well as 100% synthetic nonwovens.

OUR MANUFACTURING PROCESS

Manufacturing process of absorbent cotton

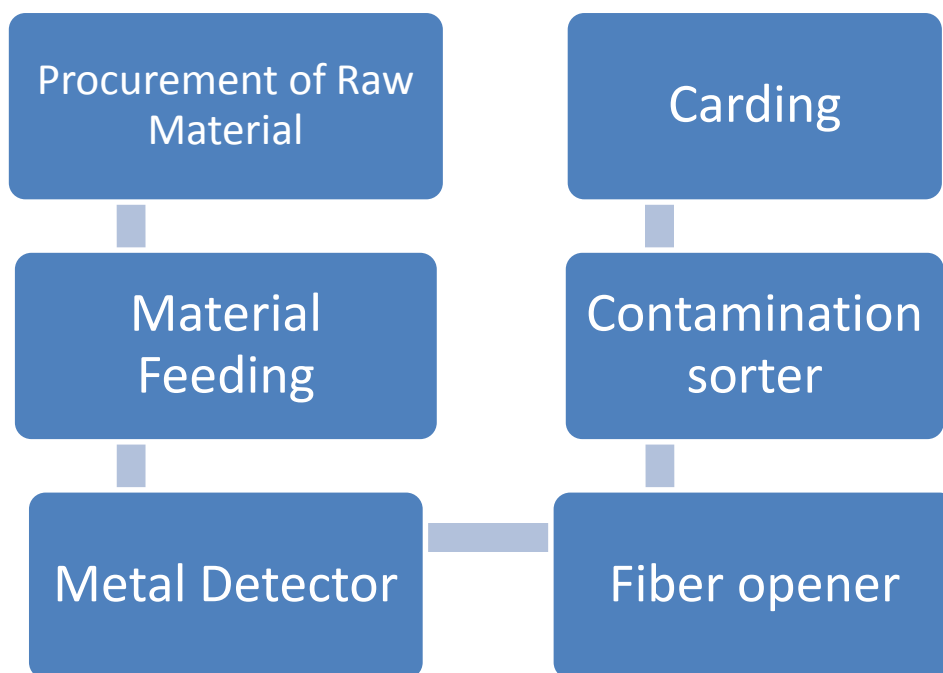

Our manufacturing process starts with procurement of raw materials i.e. raw cotton. The raw materials procured undergoes a quality check for any contamination, trash, fiber length, strength, micronaire, short fiber, fiber index and is then transferred to material feeding system. Main function of material feeding system is to open and transfer raw cotton fiber to fiber opener through metal detector and any metal particle present in raw cotton is trapped and separated in metal detector. After separation of metal particles, raw cotton then passes through fiber opener for removal of dust particles which is necessary for upstream contamination sorter. Contamination sorter is used to remove any contamination present in raw cotton i.e. PP particles, colour particles, UV particles etc. This machine consists of UV light arrangement, 24 nos. high resolution cameras and ejection system with PLC based auto controller. As soon as any contamination gets detected in any of these 24 cameras, ejection system gets operated to eject the contamination. After contamination sorter, raw cotton passes through condenser to extract raw cotton and remove dust & short fibers. Main function of cake press is to prepare a cake of specified weight, dimension and density. The specifications & quality of cake is achieved by feeding raw cotton through water spray system and automated hydraulic pressing system. 4 nos. of cakes of 250 kg each are fed in bleaching kier, where these cake are subjected to different chemical operations at elevated temperature (upto 115 deg. Cent.). The main processes in bleaching kier is washing, bleaching, hot wash, neutralization, finishing. Each bleached cotton cakes received from bleaching kier is checked for whiteness, sinking time, water holding capacity and other parameters. After quality check of individual cake these are fed in to hydro extractors, where excess water is removed by centrifugal action of machine. Wet cakes are dried in drying machine, which consists of material conveyor, steam heating system with automated control valves for each chamber. The temperature of each chambers are maintained at specified temp. Wet cotton is allowed to pass through these chambers at defined speed to achieve required moisture level in bleached cotton.

The dried bleached cotton is then open by way of fine opener as the same is necessary for upstream contamination sorter and any metal particle present in the bleached cotton is separated by way of metal detector and any contamination particles, i.e PP particles, color particles, UV particles etc is removed in the process of contamination sorter.

After the final quality check, each bale of bleached cotton from bale press are checked for whiteness, sinking time, water holding capacity and other parameters as per the quality standards.

Manufacturing process of medical consumable products

Our manufacturing process of medical consumable products starts with procurement of raw materials i.e. bleached cotton. The raw materials procured undergoes a quality check for any contamination, trash, fiber length and is then transferred to material feeding system. Main function of material feeding system is to open and transfer raw cotton fiber to fiber opener through metal detector and any metal particle present is trapped and separated in metal detector. After separation of metal particles, bleached cotton then passes through fiber opener for removal of dust particles which is necessary for upstream contamination sorter. Contamination sorter is used to remove any contamination present in raw cotton i.e. PP particles, colour particles, UV particles etc. This machine consists of UV light arrangement, 24 nos. high resolution cameras and ejection system with PLC based auto controller. As soon as any contamination gets detected in any of these 24 cameras, ejection system gets operated to eject the contamination. After contamination sorter, cotton fiber is supplied pneumatically to Carding machines. Carding is a mechanical process that disentangles, cleans and intermixes fibers to produce a continuous web or sliver suitable for subsequent processing. This is achieved by passing the fibers between differentially moving surfaces covered with card clothing. There are two sets of carding machines installed having suitable arrangement to make either cotton web or cotton sliver. The continuous cotton web received from carding machine is converted in desired width through web folding arrangement and fed either to automatic rolling m/c to make absorbent cotton wool roll followed by automatic packing m/c or to make Jumbo rolls. These Jumbo rolls are used in different machines to make Round pad, Gum Zee rolls, zig zag and even cotton wool roll. The continuous cotton sliver received from carding machine is being stored in sliver cans and then these sliver can are used to make Ear buds and cotton balls of different sizes.

All the products are subjected to quality check before final packing for weight, size, and other specifications as per required norms.

- d) **Illustration of the Book Building and Price Discovery Process**

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of Rs.20 to Rs 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (Rs.)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., Rs. 22.00 in the above example. The Issuer, in consultation with the BRLMs, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below Rs. 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

- (d) If the proportionate allotment to a Bidder works out to a number that is not a multiple of 3000 equity shares, the Bidder would be allotted Shares by rounding off to the nearest multiple of 3000 equity shares subject to a minimum allotment of 3000 equity shares.
- (e) If the Shares allotted on a proportionate basis to any category is more than the Shares allotted to the Bidders in that category, the balance available Shares or allocation shall be first adjusted against any category, where the allotted Shares are not sufficient for proportionate allotment to the successful Bidder in that category, the balance Shares, if any, remaining after such adjustment will be added to the category comprising Bidder applying for the minimum number of Shares. If as a result of the process of rounding off to the nearest multiple of 3000 Equity Shares, results in the actual allotment being higher than the shares offered, the final allotment may be higher at the sole discretion of the Board of Directors, up to 110% of the size of the offer specified under the Capital Structure mentioned in this Prospectus.
- (f) The above proportionate allotment of Shares in an Issue that is oversubscribed shall be subject to the reservation for Retail individual Bidders as described below:

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“**FEMA**”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“**RBI**”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”).

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment (“**FDI**”) through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“**DIPP**”), has issued consolidated FDI Policy Circular of 2017 (“**FDI Policy 2017**”), which with effect from August 28, 2017, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2017 will be valid until the DIPP issues an updated circular.

The Reserve Bank of India (“**RBI**”) also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015 as updated from time to time by RBI. In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular. The Indian company making such fresh issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

Under the current FDI Policy of 2017, foreign direct investment in micro and small enterprises is subject to sectoral caps, entry routes and other sectoral regulations. At present 100 % foreign direct investment through automatic route is permitted in the sector in which our Company operates. Therefore applicable foreign investment up to 100% is permitted in our company under automatic route.

In case of investment in sectors through Government Route approval from competent authority as mentioned in Chapter 4 of the FDI Policy 2017 has to be obtained by the Company.

The transfer of shares between an Indian resident to a non-resident does not require the prior approval of the RBI, subject to fulfilment of certain conditions as specified by DIPP/RBI, from time to time.
